

**III. REMARKS**

1. Claims 1, 14, 22 and 26 are amended.
2. Claims 1-7, 9-16 and 18-29 are not unpatentable under 35 U.S.C. §103(a) under Toyryla in view of Alexander et al., U.S. 6,798,767 ("Alexander").

The claims are amended to recite that there is only one call type per telephone. Toyryla in view of Alexander does not disclose or suggest associating the target telephone number with a single call type and extracting from the memory a gateway address of the gateway associated with the call type. Applicant's arguments from the prior amendment and response are reasserted herein. It is submitted that the claims should now be in an allowable form.

3. Claims 8 and 17 are not unpatentable over Toyryla in view of Alexander and further in view of Darick, at least by reason of their respective dependencies.

For all of the foregoing reasons, it is respectfully submitted that all of the claims now present in the application are clearly novel and patentable over the prior art of record, and are in proper form for allowance. Accordingly, favorable reconsideration and allowance is respectfully requested. Should any unresolved issues remain, the Examiner is invited to call Applicants' attorney at the telephone number indicated below.

The Commissioner is hereby authorized to charge payment for any fees associated with this communication or credit any over payment to Deposit Account No. 16-1350.

Respectfully submitted,

17 April 2006
